FuelCube

Power backup for internet and phone solutions

What is it?

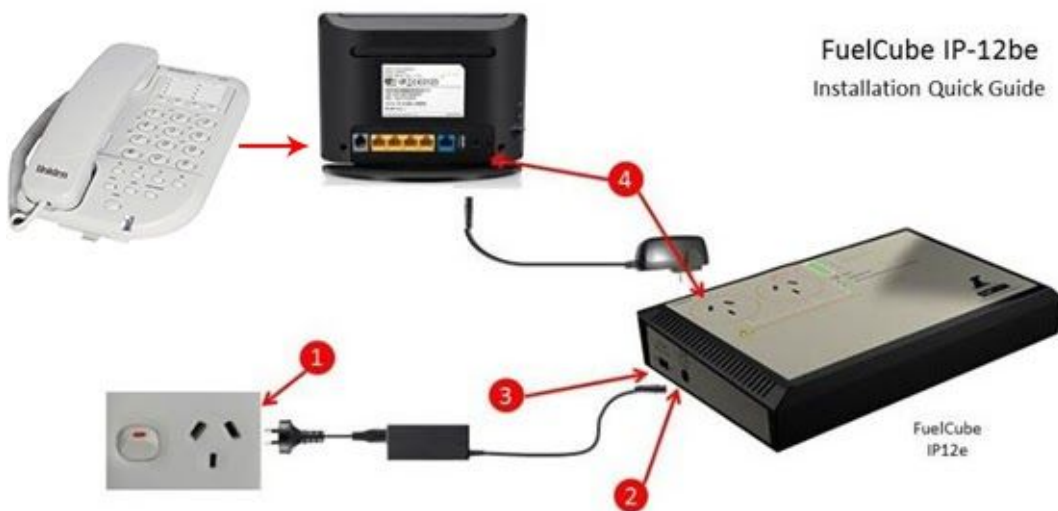

FuelCube is a home broadband power back up solution, designed specifically for continuous power (up to 4 hours) to a modem during a power outage.

It's important to note: the FuelCube only powers your modem, and not your cordless phone or laptop. This means you'll need to use a corded phone that doesn't require its own power. Plugging anything else into the fuel cube will void the one year warranty and is likely to cause overheating and permanent damage.

How to set it up

The setup below is for a typical Wireless installation.

Steps 1, 2, & 4 are plugging devices into power. Step 3 is switching the FuelCube on.

(Your modem may look different to the one pictured above.)

Talk to us about
Broadband for:

- Business
- Residential
- Apartments
- Rural/Farming
- Hotels/Motels
- Holiday Parks/Resorts
- Campus Wi-Fi
- Hotspots

Specifications:

DC Supply 12.6Vdc
Input Current 5.0A

Output Voltage & Current

120V Output
Socket Type Two 3-Pin power Socket
Max. Load 0.15A (shared)
Power 18W Max (shared)

Battery / Battery Charging

Battery type Li-Ion, 11.1V / 7500mAh / 83.25Wh
Back-up runtime Up to 4 Hours typical at 1 A
Recharge Time 8 hours to 90% of full charge without load connected. 14 hours to 90% of full charge with load connected

Environmental

Operating Temperature -25 to 60°C
Physical Size W x D x H (mm) 237 x 164 x 40 mm
Gross Weight 1.84 kg
